TO WHOM IT MAY CONCERN:

**Re: Reference for Warrick Pascoe**

I write in high support of the capabilities of Warrick Pascoe for an outstanding presentation called the "Miracle of Life". This presentation should be seen by all, as it is informative, well researched and enthusiastically presented.

Warrick demonstrated high quality in his presentation preparation with attention to detail and current research. He has taken extra effort to search for information about conception to birth, including fascinating videos and photos obtained through permission of several experts on the growth and development of babies in the womb. He is also extremely organised, well-spoken and energetic in his presentation. He has the ability to capture the attention and interest of the audience due to his great passion on the subject. He was able to relate the information well to Sport Coaching, which is the nature of our students' study.

I hope that Warrick will continue to agree to do this presentation on the 'Miracle of Life'. For our growth and development course, he sets the scene for students to be motivated to learn about the life span of any individual.

I recommend this presentation to anyone.

Yours in coaching,

Lynn Kidman, PhD  
Principal Lecturer, Sport Coaching

*Coaching is not instructing, but enabling athletes to learn.*
