To whom it may concern,

I would like to say a big thank you to the Warwick from The Making of a Masterpiece for coming in to Hamilton Girls' High School and presenting his informative and fun presentation on birth back to conception.

The presentation was really helpful for our students, as it is informative, interesting and has relevant and important message throughout it. Warwick was humorous and delivered serious messages in a way that makes young people want to listen.

Students have said; "I really enjoyed the presentation because the man spoke to us like he really understood his stuff and how to talk to us and he made it funny but we learnt stuff too. The presentation went so fast I couldn't believe I sat there for a whole period" Emma Blakie Year 9

Teachers have said; "The presentations that Warwick gave were informative, engaging and pitched to a level that the students could easily understand. The pictures and videos he used were great and supplemented the information really well. The presentation complimented our Health programme very well.

Yours sincerely,

Lynn Hodgkinson
HOD PE and Health
Hamilton Girls' High School
