PAKURANGA
COLLEGE

Dear Warwick

Thank you so much for coming to Pakuranga College and presenting "The Making of a Masterpiece" to a selected group of Year 9 students. It was unfortunate that not all of our Year 9 students could see your presentation as those that were present found it very informative and interesting. I know that the group of teachers thoroughly enjoyed the new perspective on conception.

I will endeavor to include your presentation to other groups of students in the school for next year as I think it was very beneficial to cement the learning and understanding of conception for our students.

I asked all teachers who were present for the presentation for feedback and we have written a brief reference for your website below.

"An extremely enthusiastic and informative presentation which captivated our Year 9 students, providing them with fascinating stories and facts about the wonders of human development. Warwick's passion and enthusiasm for the content is a lasting memory for both the students and teachers and his ability to engage all of the students is commendable."

Thank you once again Warwick for the informative and amazing presentation of 'The Making of a Masterpiece'.

Kind regards
