Re: Warwick Pascoe Presentation
Celebration of the Miracle of Life

I am happy to recommend Warwick Pascoe as a presenter and his presentation "*Miracle of Life*". Warwick came to Raumati South School where he gave his presentation in our school hall to our year five to year eight students. Having very little information about the presentation prior to seeing it, staff and I were unsure of what to expect and how suitable it would be for our children.

The presentation celebrates the uniqueness of each individual and tracks children backwards from birth to conception using models and photographs. Content was not presented in a way that could be controversial. It was good from a scientific and health perspective. During the presentation our student audience of around one hundred and seventy children were highly engaged.

Warwick answered questions well during the presentation which took about an hour. A number of children wanted to wait afterwards during their break time to have a closer look at models or to ask further questions. Of particular interest to our children were the examples of very premature children as children at our school could relate this to several of our pupils.

Yours sincerely,
